Needs Optimization

Overall Health (/100)

Diagnostic Highlights:

- Subpages Scanned: 1 pages (Latency & TTFB)
- Images Audited: 12 assets (WebP & Lazy Load)
- DNS Status: SPF (Pass), DMARC (Pass)

Live Website Capture

Speed & Load	Mobile Conversion	Local SEO & DNS	Security & SSL
Latency Bottlenecks	1 Mobile Friction Points	2 SEO/DNS Blindspots	1 Security Risks

Detailed Diagnostic Breakdown

Diagnostic Area	Measured Signal / Finding	Status
Homepage Load Speed	6.91s on mobile 4G	NEEDS FIX
Inner Page Latency	Slowest subpage: / (6.91s)	PASS
Backend Response (TTFB)	6896ms server time	NEEDS FIX
Google PageSpeed Performance	56/100 benchmark	NEEDS FIX
Largest Contentful Paint (LCP)	9816ms	NEEDS FIX
Mobile 1-Tap Calling	Clickable tel: link present	PASS
Lead Form Friction	1 fields on main contact form	PASS
Mobile Sticky Action Bar	Missing sticky bottom action bar	NEEDS FIX
LocalBusiness JSON-LD	Missing local business schema markup	NEEDS FIX
Social OpenGraph Cards	Blank preview on WhatsApp/iMessage	NEEDS FIX
DNS Email Authentication	SPF & DMARC verified	PASS
Internal Link Integrity	0 dead 404 links found	PASS
Next-Gen Image Formats	12 legacy images (recommend WebP)	NEEDS FIX
SSL Certificate Health	Valid (50 days remaining)	PASS

Prioritized Modernization Recommendations

#	Detected Opportunity / Leak	Severity	Recommended Solution & Business Impact
1	Insecure HTTP Protocol	CRITICAL	Production domain runs on insecure HTTP, risking browser security warnings and SEO penalties.
2	Slow Mobile Load Speed (6.91s)	HIGH	Initial mobile page load exceeds 3.0s threshold, impacting conversion rates and Google Core Web Vitals ranking.
3	Server & Database Latency (6896ms TTFB)	MEDIUM	Server takes over 1.2s to respond before serving assets, indicating unoptimized database queries or missing edge caching.
4	Missing Google LocalBusiness Schema Markup	MEDIUM	Website lacks JSON-LD structured data schema, preventing Google from displaying rich review stars and opening hours in search.
5	Image Optimization Issues (12 images scanned)	MEDIUM	12 images in legacy PNG/JPG format (should be WebP). 6 images without lazy loading. 8 images missing alt text (accessibility). Unoptimized i

6	Google Lighthouse Performance: 56/100	MEDIUM	Google PageSpeed Insights benchmarked the mobile site at 56/100 with LCP of 9816ms. Scores below 70 directly impact Google search rankings a
